Introduction

Welcome to **Quik Shopping**, your point-of-sale (POS) application designed to streamline retail operations, manage inventory, and enhance customer service. This manual provides detailed instructions for every feature and component within the application.

What is Quik Shopping?

Quik Shopping is a modern, web-based POS system that enables businesses to:

- Manage products and inventory efficiently
- Process sales transactions quickly
- Track sales history and analytics
- Manage multiple cashiers and staff
- Maintain security through role-based access control

Who Should Use This Manual?

This manual is designed for:

- **Business Owners:** Complete system administration and management
- **Store Managers:** Daily operations and staff management
- **Cashiers:** Basic POS operations and customer service
- **IT Support:** Technical configuration and troubleshooting

Getting Started

System Requirements

Browser Compatibility:

- Google Chrome (recommended)
- Mozilla Firefox
- Safari
- Microsoft Edge
- Any modern web browser with JavaScript enabled

Internet Connection: - Stable internet connection required for all features
- Minimum 1 Mbps for basic operations - 5+ Mbps recommended for optimal performance

First-Time Setup

Step 1: Account Creation

1. Navigate to the Quik Shopping application URL
2. Click on “**Sign Up**” button
3. Enter your business information:
 - **Email Address:** Your business email
 - **Password:** Create a secure password (minimum 8 characters)
 - **Business Name:** Your store/business name
4. Click “**Create Account**”
5. Check your email for verification (if required)

Step 2: Initial Configuration

1. Upon first login, you’ll be prompted to set up admin credentials
2. Create a secure **Admin PIN** (4-6 digits recommended)
3. Set up security questions for account recovery
4. Configure basic business settings

Step 3: App Walkthrough

- The system will automatically guide you through key features
- Follow the on-screen prompts to familiarize yourself with the interface
- Complete the walkthrough to unlock all features

Authentication & Account Management

Login Process

Standard User Login

1. Navigate to the login page
2. Enter your **email address**
3. Enter your **password**
4. Click “**Sign In**”

Admin Access

1. After standard login, access admin features by:
2. Looking for the **Admin** button in the interface
3. Entering your **Admin PIN** when prompted
4. Confirming with security questions if required

Password Management

Forgot Password Recovery

1. On the login page, click **“Forgot Password?”**
 2. Enter your email address
 3. Check your email for reset instructions
 4. Follow the link to create a new password
-

Admin Features

Admin Dashboard Overview

The admin dashboard provides comprehensive control over all system functions:

Access Requirements

- Valid user account login
- Admin PIN verification
- Security question verification (when enabled)

Admin Interface Elements

- **Dashboard Summary:** Key metrics and quick actions
- **User Management:** Cashier and staff controls
- **System Settings:** Configuration options
- **Security Controls:** Access and permission management

Admin Setup Process

Initial Admin Configuration

1. **Click Admin Setup:** Located in the main navigation
2. **Enter Business Details:**
 - Business name
 - Contact information
 - Operating hours
3. **Configure Security Settings:**
 - Set admin PIN requirements
 - Enable/disable security questions
 - Set session timeout preferences
4. **Save Configuration:** Apply all settings

Admin Permissions Management

1. **Access Control Settings:**
 - Enable/disable cashier dialog confirmations

- Set product management permissions
 - Configure inventory access levels
2. **Security Preferences:**
 - Require admin approval for critical actions
 - Set automatic logout timers
 - Configure audit trail settings

System Administration

Data Management

1. **Clear System Data:**
 - Access **Settings** → **Data Management**
 - Click **“Clear All Data”** (use with extreme caution)
 - Confirm action with admin PIN
 - System will remove all products, transactions, and history
-

Product Management

Product Overview

Products are the core items you sell through Quik Shopping. Each product contains essential information for inventory management and sales processing.

Product Information Fields

Basic Product Details

- **Product Name:** Clear, descriptive name for easy identification
- **Category:** Organizational grouping (e.g., Electronics, Clothing, Food)
- **Price:** Selling price in your local currency
- **Description:** Detailed product information

Adding New Products

Step-by-Step Product Creation

1. **Navigate to Product Management:**
 - Click **“Products”** in the main navigation
 - Select **“Add New Product”**
2. **Enter Product Information:**
 - **Product Name:** Enter a clear, descriptive name
 - **Category:** Select existing category or create new one
 - **Price:** Enter selling price (numbers only)
3. **Add Product Image (Optional):**
 - Click **“Upload Image”**
 - Select image file from your device

- Crop/adjust image as needed
 - Confirm image selection
4. **Additional Information:**
 - **Product Description:** Add detailed description
 5. **Save Product:**
 - Review all information for accuracy
 - Click **“Save Product”**
 - Confirm creation with cashier dialog (if enabled)

Editing Existing Products

Accessing Product Editor

1. **Find the Product:**
 - Go to **“Products”** or **“Inventory”**
 - Use search function to locate product
 - Or browse through categories
2. **Open Edit Mode:**
 - Click the **edit icon** (pencil) on the product card
 - Or click product name and select **“Edit”**

Making Changes

1. **Update Information:**
 - Modify any field as needed
 - Changes are highlighted for review
 - Required fields must remain completed
2. **Image Management:**
 - Click current image to replace
 - Upload new image or remove existing one
 - Adjust image positioning if needed
3. **Save Changes:**
 - Review all modifications
 - Click **“Save Changes”**
 - Confirm with admin PIN if required

Product Categories

Creating Categories

1. **Access Category Management:**
 - Go to **Settings** → **Categories**
 - Click **“Add New Category”**
2. **Configure Category:**
 - **Category Name:** Clear, descriptive name
 - **Description:** Purpose and product types
3. **Save Category:**
 - Click **“Create Category”**

- Confirm with cashier dialog if enabled

Managing Existing Categories

1. **Edit Categories:**
 - Find category in the list
 - Click edit icon
 - Modify name or description
 - Save changes
 2. **Delete Categories:**
 - Select category to remove
 - Click delete icon
 - Confirm deletion (products will be moved to “Uncategorized”)
-

Point of Sale Operations

POS Interface Overview

The Point of Sale interface is designed for quick, efficient transaction processing during customer interactions.

Main POS Components

- **Product Search Bar:** Quick product lookup
- **Category Filters:** Browse products by type
- **Product Grid:** Visual product selection
- **Shopping Cart:** Transaction items and totals
- **Payment Processing:** Transaction completion

Processing Sales Transactions

Starting a New Sale

1. **Access POS Mode:**
 - Click “**New Sale**” or “**POS**”
 - Ensure clear cart (empty previous transaction)
 - Verify correct cashier login
2. **Adding Products to Cart:**

Method 1: Product Browse

- Browse product categories
- Click on product cards to add to cart
- Quantity automatically set to 1

Method 2: Search Function

- Use search bar to find products
- Type product name
- Select from search results
- Click to add to cart

Managing Cart Items

Adjusting Quantities

1. **Increase Quantity:**
 - Click “+” button next to item
 - Cart total updates automatically
2. **Decrease Quantity:**
 - Click “-” button next to item
 - Quantity decreases by one
 - Item removes at zero quantity
3. **Remove Items:**
 - Click “X” or delete button
 - Confirm removal if prompted
 - Item completely removed from cart

Payment Processing

Payment Options Quik Shopping supports multiple payment methods: - **Cash:** Physical cash payments - **Card:** Card-based payments - **Transfer:** Bank transfer payments

Processing Payments

1. **Select Payment Method:**
 - Choose from available payment options
 - Enter amount received from customer (for cash)
 - System calculates change due (for cash)
2. **Complete Transaction:**
 - Verify payment amount
 - Provide change to customer (if cash)
 - Complete sale
 - Transaction is recorded in history

Cart Management

Cart Functionality Overview

The shopping cart is the central component for building customer transactions, managing item quantities, and calculating totals.

Cart Operations

Adding Items to Cart

1. **Standard Product Addition:**
 - Browse or search for products
 - Click product to add to cart
 - Default quantity is 1 unit
 - Cart updates immediately

Quantity Management

Modifying Item Quantities

1. **Increment/Decrement Buttons:**
 - Use “+” to increase quantity
 - Use “-” to decrease quantity
 - Minimum quantity is 1
2. **Item Removal:**
 - Click “**Remove**” button on item
 - Or reduce quantity to zero
 - Item immediately removed from cart
3. **Clear Entire Cart:**
 - Click “**Clear Cart**” button
 - Confirm clearing action
 - All items removed simultaneously

Cart Calculations

Price Calculations

1. **Item Subtotals:**
 - Automatically calculated: $\text{Price} \times \text{Quantity}$
 - Updates in real-time
 - Displays per-item totals
 2. **Cart Total:**
 - Sum of all item subtotals
 - Final amount due from customer
 - Prominently displayed
-

Cashier Management

Cashier System Overview

Quik Shopping provides comprehensive cashier management to control staff access, track performance, and maintain transaction security.

Cashier Authentication

Sign-In Methods

Secure Dropdown Mode

1. **Activation:**
 - Admin enables “Secure Sign-In Mode”
 - Only approved cashiers can sign in
 - Dropdown list shows authorized names
2. **Cashier Sign-In Process:**
 - Select cashier name from dropdown
 - Begin transaction processing
 - All transactions linked to cashier

Free Text Mode

1. **Configuration:**
 - Admin disables “Secure Sign-In Mode”
 - Any name can be entered
 - No pre-approval required
2. **Sign-In Process:**
 - Type cashier name in text field
 - Start processing transactions
 - Name recorded with all sales

Managing Approved Cashiers

Adding New Cashiers

1. **Admin Access Required:**
 - Sign in with admin credentials
 - Navigate to **Cashier Management**
 - Click “**Add New Cashier**”
2. **Cashier Information:**
 - **Full Name:** Complete cashier name
 - **Employee ID:** Unique identifier (optional)
3. **Save Cashier:**
 - Click “**Save Cashier**”
 - Cashier added to approved list

Editing Cashier Information

1. **Find Cashier Record:**
 - Access **Cashier Management**
 - Locate cashier in approved list
 - Click “**Edit**” button
2. **Modify Details:**

- Update name or information
- Save changes with admin authorization

Removing Cashiers

1. **Deactivation Process:**
 - Select cashier from list
 - Click “**Remove**” button
 - Confirm removal action
 - Requires admin PIN verification
2. **Historical Data:**
 - Past transactions remain linked to cashier
 - Reports still show cashier performance
 - Only future access is prevented

Cashier Dialog System

Confirmation Dialogs

1. **When Dialogs Appear:**
 - Critical transaction modifications
 - Administrative actions
 - Product management actions
2. **Dialog Process:**
 - System prompts for cashier identification
 - Enter cashier name or select from dropdown
 - Action proceeds after confirmation

Disabling Cashier Dialogs

1. **Admin Configuration:**
 - Access **Settings** → **Cashier Settings**
 - Toggle “**Disable Cashier Dialog**”
 - Requires admin PIN confirmation
 - Applies to all future operations
2. **Impact of Disabling:**
 - Faster transaction processing
 - Reduced security verification
 - All actions attributed to current session

Sales History & Analytics

Transaction History Overview

Quik Shopping maintains comprehensive records of all sales transactions, providing detailed insights into business performance.

Viewing Sales History

Accessing Transaction History

1. **Navigate to History:**
 - Click “**History**” in main navigation
 - Requires appropriate user permissions
2. **History Display Options:**
 - **Chronological View:** Most recent transactions first
 - **Date Range Filter:** Specify time periods
 - **Search Function:** Find specific transactions

Transaction Details Each transaction record includes: - **Transaction ID:** Unique identifier - **Date and Time:** Exact transaction timestamp - **Cashier Name:** Staff member who processed sale - **Items Sold:** Complete product list with quantities - **Payment Method:** How customer paid - **Total Amount:** Final transaction value

Detailed Transaction Analysis

Individual Transaction View

1. **Open Transaction Details:**
 - Click on any transaction in history list
 - View comprehensive transaction breakdown
 - See all associated information
2. **Transaction Components:**
 - **Product Details:** Each item with price and quantity
 - **Payment Information:** Method and amount details
 - **Timing Data:** Transaction timestamps
 - **Staff Information:** Cashier information

Sales Analytics

Daily Sales Summary

1. **Total Sales:** Daily revenue totals
2. **Transaction Count:** Number of transactions per day
3. **Average Sale:** Average transaction value
4. **Popular Products:** Best-selling items

Performance Metrics

1. **Sales Trends:** Revenue patterns over time
2. **Peak Hours:** Busiest transaction periods
3. **Product Performance:** Individual product sales data
4. **Cashier Performance:** Staff transaction metrics

Settings & Configuration

System Settings

General Settings

1. **Business Information:**
 - Store name and contact details
 - Operating hours
 - Location information
2. **Application Preferences:**
 - Theme selection (Light/Dark mode)
 - Display preferences
 - Currency settings

User Preferences

1. **Account Settings:**
 - Profile information
 - Email preferences
 - Password management
2. **Interface Customization:**
 - Dashboard layout
 - Quick access buttons
 - Display options

Data Management

System Data

1. **Clear All Data:**
 - Remove all products, transactions, and history
 - Requires admin authorization
 - Irreversible action - use with extreme caution
 2. **System Reset:**
 - Return system to initial state
 - Maintains user accounts
 - Removes business data
-

Security Features

Access Control

Admin PIN Management

1. **Setting Admin PIN:**
 - Configure during initial setup
 - 4-6 digit numeric PIN recommended

- Required for sensitive operations
2. **PIN Recovery:**
 - Email-based PIN reset
 - Security question verification
 - Admin override capabilities

Security Questions

1. **Setup Process:**
 - Configure during admin setup
 - Select from predefined questions
 - Provide memorable answers
2. **Recovery Usage:**
 - PIN reset verification
 - Account recovery assistance
 - Security override situations

Session Management

Automatic Logout

1. **Timeout Settings:**
 - Configurable session timeout
 - Automatic logout after inactivity
 - Security-focused design
2. **Manual Logout:**
 - Secure session termination
 - Clear all session data
 - Protect sensitive information

Troubleshooting

Common Issues and Solutions

Login and Authentication Problems

Unable to Log In Problem: Cannot access the system with correct credentials

Possible Causes and Solutions: 1. **Incorrect Credentials:** - Verify email address spelling - Check password case sensitivity - Use “Forgot Password” if needed - Clear browser cache and cookies

2. **Browser Issues:**
 - Try different web browser
 - Update browser to latest version
 - Disable browser extensions temporarily

- Clear browser data and restart
- 3. Internet Connection:**
- Check internet connectivity
 - Try accessing other websites
 - Restart router/modem if needed

Admin PIN Not Working Problem: Admin PIN is rejected despite being correct

Solutions: 1. **PIN Recovery Process:** - Use “Forgot PIN” option - Answer security questions correctly - Follow reset email instructions

- 2. Account Lockout:**
- Wait for lockout period to expire
 - Use security question recovery
 - Check for caps lock or num lock issues

Product Management Issues

Products Not Appearing Problem: Added products don’t show in product list or POS

Troubleshooting Steps: 1. **Check Product Status:** - Verify product was saved successfully - Confirm category assignment - Review product visibility settings

- 2. Browser Refresh:**
- Refresh the page (F5 or Ctrl+R)
 - Clear browser cache
 - Log out and log back in
 - Try different browser
- 3. Search and Filter Issues:**
- Clear all search filters
 - Check category filters
 - Verify search terms spelling
 - Look in “All Categories” view

Cart and Transaction Problems

Items Not Adding to Cart Problem: Clicking products doesn’t add them to cart

Troubleshooting: 1. **Session Issues:** - Refresh the page - Clear cart and start fresh - Log out and log back in - Check if logged in properly

- 2. Browser Issues:**
- Clear browser cache
 - Try different browser

- Check browser console for errors

Performance Issues

Slow Loading Times Problem: Application loads slowly or becomes unresponsive

Optimization Steps:

1. **Browser Optimization:**
 - Close unnecessary browser tabs
 - Clear browser cache and cookies
 - Disable unnecessary browser extensions
 - Restart browser completely

2. **Internet Connection:**

- Test internet speed
- Move closer to WiFi router
- Use wired connection if possible

3. **System Resources:**

- Close other applications
- Restart computer
- Check available memory
- Update browser to latest version

Error Messages and Meanings

Common Error Messages

“Access Denied” Meaning: User lacks permission for attempted action

Solution: - Check user role and permissions - Use admin PIN if required - Verify account status

“Connection Error” Meaning: Network connectivity issues **Solution:** -

Check internet connection - Refresh page and retry - Wait and try again later

“Invalid Input” Meaning: Data entered doesn’t meet requirements **Solu-**

tion: - Check input format requirements - Verify all required fields completed - Remove special characters if not allowed

“Session Expired” Meaning: User session has timed out **Solution:** - Log

in again - Save work before continuing - Avoid long idle periods

Frequently Asked Questions

General Questions

Q: What browsers are supported? A: Quik Shopping works best with modern browsers including Chrome, Firefox, Safari, and Edge. We recommend

using the latest version of your preferred browser for optimal performance.

Q: Can I use Quik Shopping offline? A: No, Quik Shopping requires an active internet connection to function properly as it's a cloud-based application.

Q: How secure is my data? A: Your data is protected with industry-standard security measures including encrypted connections, secure authentication, and role-based access control.

Product Management

Q: How many products can I add? A: There's no strict limit on the number of products you can add. The system is designed to handle thousands of products efficiently.

Q: Can I add product images? A: Yes, you can upload images for each product. Supported formats include JPG and PNG files.

Q: How do I organize products? A: Use categories to organize your products. You can create custom categories and assign products to them for easier management.

Sales and Transactions

Q: Can I process returns? A: Currently, the system tracks transactions but doesn't have a dedicated returns processing feature. This is planned for future updates.

Q: How are transactions stored? A: All transactions are automatically saved and can be viewed in the Sales History section with detailed information about each sale.

Q: Can multiple cashiers use the system? A: Yes, you can set up multiple cashiers and track their individual performance and transactions.

Admin and Security

Q: What if I forget my admin PIN? A: You can reset your admin PIN using the security questions you set up during initial configuration, or through email recovery.

Q: Can I backup my data? A: Currently, data is automatically backed up on our secure servers. Manual export features are planned for future updates.

Q: How do I reset the entire system? A: Admins can clear all system data through Settings → Data Management, but this action is irreversible.

Technical Support

Q: Where can I get help? **A:** This user manual covers most common questions and issues. For additional support, contact your system administrator or technical support team.

Q: How do I report bugs or request features? **A:** Contact your system administrator who can report issues to the development team or discuss feature requests.

Contact Information

For technical support or additional assistance, please contact your system administrator or designated support personnel.

System Version: 1.0 **Last Updated:** December 2024 **Manual Version:** 1.0

This manual covers all currently implemented features in Quik Shopping. Additional features and enhancements are continuously being developed and will be documented in future manual updates.
